PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/549,658	Applicant(s) SMITH ET AL.	
	Examiner Thomas R. Hannon	Art Unit 3682	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3682

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 12.

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-7, 15, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Saitamakiki GB 1,360,515.

Saitamikiki discloses a bearing arrangement comprising a spherical bearing having a bearing housing (7, 8, 9, 10) and a ball (6) located therein, the bearing housing having a rigid outer race (10) and a rigid inner race (9, or 9 and 7) and an elastomeric portion (8) sandwiched between the races. The outer race 10 is securely held in an interference fit (press fit, column 2,

line 61) hole in torque rod 11. The “predetermined range” of torque of claim 1 is inherently anticipated by the arrangement of Saitamakiki. With respect to claim 4, the elastomeric portion 8 is bonded to the inner and outer races (col. 2, lines 53-56). With respect to claims 5, 6, and 15, the blocks 7 are liners provided on inner race 9 and in contact with the ball 6; the blocks 7 formed of Delrin, which is a self-lubricating material. With respect to claims 7 and 16, column 2, lines 33-34 disclose the blocks may be formed of “sintered alloy” which is a metal in contact with the metal ball 6.

Claims 2, 3, and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saitamakiki GB 1,360,515.

With respect to claims 2 and 3, the specific ranges of the oscillatory torque would have been obvious to one of ordinary skill in the art, as such ranges are subject to optimization based on specific or desired uses of the device. “[W]here the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation.” In re Aller, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas R. Hannon whose telephone number is (571) 272-7104. The examiner can normally be reached on Monday-Thursday (8:30-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on (571) 272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
